

## EFRAT NETWORKS:

### EXCELLENCE IN IT SERVICE WITH INTERNATIONAL PRESENCE

Efrat Networks has 14 years of experience in managing and maintaining IT systems for businesses with offices or branch offices in the greater New York area and in Israel. In a business environment that is increasingly dependent upon computer systems and communications, Efrat Networks acts as your CIO and as a well-organized virtual IT department which creates a competitive edge to businesses ranging from the smallest organizations to 100+ employee offices in New York and Israel.

Our well trained and professional teams with around the clock availability specialize in:

- Helpdesk, remote support and NOC services
- Field service
- IT integration
- Physical and virtual servers
- Hosting, and cloud services
- Robust and reliable WIFI and network integration
- Backup and business continuity
- Local and global internet connectivity services
- Security and cyber-security
- Video conferencing
- Phone systems and voice systems
- Low voltage and wiring installations
- SaaS/laaS and other.

In conjunction with our trained and certified professional team, Efrat Networks operates sophisticated and deeply integrated ticketing, monitoring and RMM systems that provide us with detailed insight into all managed resources in real time and across a longer time period. Our approach and systems enable us to collect and analyze data in order to forecast and better anticipate potential problems, be proactive, and act before IT issues start to cause downtime and waste money and valuable time. We work while you sleep so that when you get to the office, all is ready to go.

Efrat Networks brings value starting by working with your CFO and building accurate IT budgets, integrating IT with other processes in your company, network upgrades and installations through high level planning up to helpdesk services and user support. We believe that a smooth and secure operation of our clients' systems and their success in business is our success.
